NEW TERMS OF SALE--Net Cash Prices.

FOR a number years it has been our custom to offer a series of premiums on orders in the shape of discounts, etc. Realizing that in many instances this was confusing to purchasers, we have decided this season to abandon all such, and to reduce our prices to a corresponding or even lower level, a plan which we feel will be more satisfactory to buyers in every respect.

Not only have we brought our prices down to the basis of no premiums or discounts, but we have put them even lower in many instances.

The tendency of the times is towards low net cash prices, and we feel sure that our action in cutting loose from the practice, universal in the trade, of giving premiums and offering "special inducements," will be endorsed and appreciated by our customers.

REMARKS ABOUT ORDERING.

Read and Follow Carefully, This Will Insure You Prompt Service on Our Part.

OUR PRICES ARE STRICTLY CASH.

The proper remittance should accompany the order, and should be enclosed with it.

HOW TO ORDER—We do not send Seeds, Plants or Bulbs C. O. D. Write your Name, Post Office, Street and Number, County, State and your express Office plainly with black ink, on every order and every time you write to us. PREPAID—Prices given in this catalogue include prepayment by mail on Bulbs, Plants and Seeds except where offered "by express," then it is meant that the purchaser is to pay charges.

REMEMBER—Sometimes in the busiest season others may have orders ahead of you, which must be filled in rotation. Order early.

COST OF REMITTING—Our customers may select additional bulbs FREE, with every order to the amount of the cost of the money order, registered letter or other remittance.

VERY IMPORTANT—You can greatly aid us by using Order Sheet, as follows:

1. Place the quantity wanted before each article.

3. As nearly as possible make out your list in the same order in which goods are catalogued, beginning at the front.

HOW TO PAY—Send cash with order (we can only send

WE GUARANTEE SATISFACTION and safe arrival of goods to any point in the United States or Canada, whether by Mail or Express.

to value of money received) by New York or Chicago Draft, Registered Letter, Money Order, Express Order, or Cash by Express, in any of these ways at our risk. Postage stamps are taken as cash. Registered Letters are generally very safe and you can send that way from any postoffice and get our receipt by return mail, showing letter has reached us. When coin is sent it should be carefully wrapped or pasted between two pieces of paper or on cardboard. We cannot be responsible for loose coin as it cuts through the envelope.

ERRORS—If stock is not as expected, compare with the order, read catalogue rules carefully, and if we are in the wrong write us at once, giving all particulars, as in paragraph above; do not complain to others until we have had a chance.

TIME OF SENDING—Not all Fall Bulbs are ready at the same time, but nearly all of the Dutch and French importations are in store by September 15th. The following table gives approximate date of arrival.

October 20th, full supply of Lillies, Chinese Narcissus, Dahlias, Paeonies and Gladiolus; November 15th, Spiraea, Lily of the Valley, new crop of Tuberoses.

Unless otherwise stated by our customers we always forward such bulbs as are ready on receipt of order, and the balance as fast as the different kinds arrive. If other arrangements are desired please to so state at the bottom of the order.

1 BEGONIA, 1 DWARF ORANGE, 1 HIBISCUS, and 1 PRETTY PALM,
1 NIGHT-BLOOMING CESTRUM, 1 HELIOTROPE, 1

This is a wonderful bargain, as they are, one and all, grand, and will be a continual source of enjoyment and surprise to you throughout the entire year. No two have flowers alike. In ordering, say "GRAND COMBINATION" Set.

Price, Separately, Ten Cents each, Except Where Noted.

NEW PINK ROSE, MAMAN COCHET.

The color is a deep rose-pink, the inner side of the petals being a silver-rose, shaded and touched with golden-yellow. We pronounce this the finest Rose by far that has been introduced from France in the past five years. Be sure to try it, as it will not disappoint you. We can, with full confidence, recommend this Rose.

NEW EVERBLOOMING ROSE, CLOTILDE SOUPERT.

This lovely Rose comes from the Garden of Luxembourg, France, and is undoubtedly the finest Rose of its class. The flowers are borne in clusters, and are of large, round, flat form, and beautifully imbricated petals; perfectly full and double and deliciously sweet; color, beautiful pinkish amber or pale creamy yellow, delicately flushed with silvery rose, sometimes ivory white, exquisitely tinted with pale salmon, and sometimes red and white flowers are produced on the same plant. It is a particularly elegant and handsome Rose, always greatly admired. The bush is a vigorous and compact grower, and a continuous and remarkably profuse bloomer, being literally loaded with Roses. It is highly recommended for window and house culture; in fact, we think it the very best. 15 cts. each.

NEW PURE WHITE HYBRID TEA ROSE, KAISERIN AUGUSTA VICTORIA.

This beautiful Rose has not only a royal name, but is a royal Rose as well. We have white Roses that have elegant buds, but when full blown are not all that is desired. Then again we have white Roses that are elegant when full blown, but have poor buds. This Rose combines both these good qualities. It is a continuous bloomer, producing successive crops of buds and flowers in greatest profusion. The buds are very beautifully formed, with large petals of great substance; shows no center when fully open. Color, pure snowy-white; and when you add a rich perfume, coupled with a vigorous growth, what more could you ask? This Rose is an easy winner over all competitors in its color, and we predict that more of it will be planted than all other white Roses combined.

NEW GERANIUM, FLEURE DE NEIGE.

This is without doubt, one of the best double white Geraniums ever offered. It is a strong grower, a profuse bloomer, always coming perfect in color and substance; the trusses are very large, flowers beautifully formed, of the purest white, retaining their color in the sun, not drawing to a pinkish color. 15 cts. each.

NEW GERANIUM, JOHNNIE DOYLE.

The color of the flower is a bright vermilion-red, of a most pleasing shade. The flowers are absolutely perfect in shape, contour and make-up, trusses exceptionally large, and borne in immense spherical balls, measuring eight inches in diameter. It does finely in the open ground, and is perfectly reliable as a bedding Geranium of the highest merit. It makes a compact dense growth, and has all the qualities that go to make the perfect Geranium that it is. Fine also in pots.

NEW DWARF ORANGE.

This is one of the prettiest plants we grow. Everyone is delighted with it. It blooms and fruits when quite small. We have seen plants in bloom and fruit when but six inches in height. Don't fail to try it.

SUPERB NEW DOUBLE WHITE FUCHSIA, MRS. E. G. HILL.

This superb variety is undeniably the most perfect and beautiful double white Fuchsia ever raised. The short tube and sepals are a bright, rich, reddish-crimson color; corolla extra large, full and double; flower of the largest size; is of upright growth, not coarse but compact, and very symmetrical. It has every quality to recommend it—size, freedom of bloom and constitution. 15 cts. each.

NEW HELIOTROPE, SAPPHIRE.

For a neat, dwarf habit, profusion of bloom and richness of color this Heliotrope has no equal, and its vivid color of royal purple, with a distinct white center, gives us something entirely new in color, either for Summer decoration or Winter flowering.

THE BEAUTIFUL PALM, WASHINGTONII FILIFERA.

This is the easiest and quickest growing of all the Palms. Nothing can be more beautiful for house or yard decoration. Invaluable for vases and baskets.

CESTRUM, OR NIGHT-BLOOMING JASMINE.

These beautiful shrubs are cultivated for the delicate fragrance of their elegant flowers, which are borne in clusters. They are of easy cultivation. *Cestrum Parqui* is a well known and highly prized plant, blooming nearly all the year. It is a native of Chili. An excellent garden plant, growing rapidly. Foliage long and of a deep green color. Produces its richly fragrant flowers at every joint. It is also well adapted to house and window culture.

NEW CHRYSANTHEMUM, GOLDEN WEDDING.

This is the grand golden-yellow variety. Nothing can exceed the richness of its color. It is unrivaled in this respect. It is a remarkably vigorous grower, and has such strength of stem that it carries its great globular flower erect, giving it a bold, majestic appearance. The form of Golden Wedding is unique, the outer petals droop downward in picturesque irregularity, the center of the flower is built high, with broad petals irregularly overlaid, so that although the flowers are so large they are not heavy, solid-looking like many others.

NEW CHRYSANTHEMUM, MRS. J. LEWIS CHILDS.

One of the very best incurved varieties, and was awarded a medal of excellence at the American Institute Fair. It is a free, strong grower, easily attaining four feet in the open ground. The enormous flowers are as round as a ball, and produced in abundance on long stems. The pure snowy-white color develops a tinge of pink so exquisitely faint that one almost looks for the color in the light, and not the flower. Used for decoration in the evening. This feature has been much admired.

NEW CARNATION, WHITE WINGS.

A pure snow-white variety, waxy, without fleck or tint, of the largest size, serrated edge; delightfully fragrant. Much the best white Carnation grown. Excellent for pot or garden culture.

NEW BEGONIA, THURSTONII.

This elegant new Begonia is without a rival as to combinations of both foliage and flowers. The underside of leaves is a rich, purplish red, the veins very prominent, while the face, or upper side, is a bronzy-green, shaded with crimson and olive, with a peculiar glossy, metallic luster over all. Flowers rosy-white, in large clusters, well above the foliage. The plant has a fine habit. Taken altogether, we think this the best all-round Begonia we grow.

THE BLUE SOLANUM, SEAFORTHIANUM AZUREUM.

This is certainly one of the finest plants lately introduced. It is of robust growth, soon making fine specimens that will grow over your windows or conservatory. In Southern localities it can be planted around the porch and will soon cover them with handsome cut foliage, and hundreds of clusters of large lavender blue Wistaria like flowers, brightly set off with golden stamens, clusters are enormous often measuring 12 by 15 inches.

NEW HIBISCUS, SINENSIS GIGANTEUS.

This is a splendid plant, with large, gorgeous-colored flowers that attract attention everywhere.

This "Grand Combination" of 16 elegant plants, all different, for the small sum of \$1.00, will cost you twice that price from any other catalogue.

We Present Here a list of Plants of Exceptional Merit for Winter-blooming

... OR FOR HOUSE CULTURE ...

NEW DWARF ALLAMANDA.

ALLAMANDA WILLIAMSII—This handsome variety is entirely distinct from all others, being quite dwarf and in no way resembling a climber, but forming a compact bush with trusses of bloom at every point, and having two to four expanded blooms on each extremity at the same time and buds innumerable. It continues flowering the whole Summer, and, with proper management, in the Winter also. The flowers are from three and one-half to four and one-half inches in diameter, of a very rich, yet delicate tint of yellow, and are deliciously scented. Fine plants, 25 cts. each.

SANSEVERIA ZEALANICA—A beautiful plant specially adapted for the decoration of drawing rooms and halls, as it stands drouth and dust with impunity, and requires scarcely any water. The leaves, as shown in cut, are beautifully striped crosswise, with broad, white variegations on a dark green ground. It is a rare and beautiful plant, which should be abundantly grown for positions out of the reach of sunlight where other plants will not thrive. It can be placed in any position in any room, and do well. It has a singular beauty for decorative purposes which other plants do not possess, and is useful both in Winter and Summer. Fine plants, 10 and 25 cts. each.

EPIPHYLLUM, OR LOBSTER CACTUS (New.)

This grand member of the Cactus family should be in every plant collection. It is of the easiest culture, requiring a poor, sandy soil, and but little moisture. The plant has a beautiful habit, soon attains a large size, and literally bends under its weight of scarlet bloom, which continues for weeks. Price, 10 cts. each.

ALLAMANDA WILLIAMSII.

ACALYPHA OR SHRUBBY COLEUS—A new plant with the richest colors and on account of its vigorous habit stands the sun perfectly well. Much used in parks and public gardens, always attracting attention. The foliage resembles the Autumn Maple leaves in shape and color. They also make nice plants for the window garden. 10 cts.

MILTONIANA—A very valuable addition to this useful class. The leaf

is four to five inches long by one and one-fourth broad, notched, and very sharp pointed. The color is bright green, bordered with creamy white; short jointed and a free, rapid grower.

TRIUMPHANS—Ovate pointed leaf two by four inches, very bright in color; a good red, marbled darker; a very fine, free grower.

CISSUS DISCOLOR—A very handsome climber with leaves beautifully shaded dark green, purple and white, upper surface having a rich, velvet like appearance. Price, 10 cts. each.

STROBILANTHES DYERIANUS.

Sweet-Scented Violets.

DOUBLE PURPLE VIOLET, MARIE LOUISE—To contrast with the white, we offer this fine double, deep bluish purple, sweet-scented variety recently introduced. Desirable for pots or gardens. Plants hardy and bloom almost as freely as the white, especially in the Winter and Spring. Price, 10 cts. each.

SWANLEY WHITE, OR QUEEN OF FRAGRANCE—Unquestionably the finest double white variety in all existence, and is a decided acquisition even to the smallest collection of plants. It is desirable for pot plant for Winter culture, for planting in cold frames, or for planting in the open ground. Unequalled for its great freedom of flowers and fragrance; flowers of the purest white. Price, strong plants, 10 cts.

THE HARDY DOUBLE ENGLISH VIOLET—This Violet is entirely hardy, perfectly double, a deep violet purple color and deliciously fragrant. It surpasses the well-known "Marie Louise" Violet in richness of color, being darker, and far excels it in its delightful odor; this is one of its greatest merits. It is entirely free from disease and will grow and bloom in any garden and in any situation. Nothing is more appropriate for cemetery plots than the Hardy Double English Violet. (See cut.) Price, 15 cts each; 2 for 25 cts.

GENISTA FRAGRANS, OR FOUNTAIN OF GOLD—A most desirable Spring flowering plant, producing its fragrant bright golden yellow flowers in the greatest profusion. As a Winter plant of the easiest culture it is unsurpassed. Especially desirable for Easter decoration. Price, 10 cts. each.

HARDY DOUBLE BLUE ENGLISH VIOLET.

FARFUGIUM (LIGULARIA) GRANDE—A very ornamental plant, with broad shiny dark green foliage, which is irregularly blotched with bright yellow and occasionally with white and rose. As a border plant it has few equals. It is not entirely hardy in the Northern States, and so should be taken in the house in Winter. 15 cts. each.

STROBILANTHES DYERIANUS, ROYAL PURPLE—A new house and bedding plant sent out last year by Messrs. F. Sander & Co., of England, at \$2.00 each, and to which was awarded the Gold Medal offered by the King of Belgium at the Ghent Exhibition. It forms a compact bush 18 inches high, with leaves 6 to 9 inches long, 3 to 4 inches wide, and of the most intense metallic purple color, shading into light rose with a light green margin, a combination unapproached by any other plant. Mr. Pistner, of the White House, Washington, put it in the open border, where it grew and colored up beyond all expectation in a very exposed position. It has created a veritable sensation wherever exhibited, and will be grown by the thousands as a bedding plant, while at the same time one of the most brilliant decorative plants in existence; for the table ornament, parlor or greenhouse nothing can equal it. Price, 10 cts. each; 3 for 25 cts.

FARFUGIUM GRANDE.

CROWN OF THORNS, From the "Hills of Judea"—On the wild rocky hills of Judea and in the immediate neighborhood of Jerusalem this emblematic plant is found, and from there our original stock was secured. It is a peculiar plant, thorny, with a few bright green leaves and an abundance of light rose blossoms of easiest culture, and can be trained to assume any shape as is shown in this cut. "The Crown of Thorns," worn by our Saviour, was made out of this plant, and the thorny branches were frequently used for the chastisement of offenders. Indeed some sacred historians assert that the drink given to our Saviour before his death was made from the juice of this plant. Price, first size, 15 cts. each; 2 for 25 cts.

STEPHANOTIS FLORIBUNDA—One of the rarest and most charming climbing house plants, growing rapidly with long, glossy, deep green foliage, producing clusters of pure white deliciously fragrant flowers. Price, 25 cts. each.

STEPHANOTIS FLORIBUNDA.

New Gilt Edge German Canna,

Queen Charlotte.

(See cut, upper left hand corner.)

Of German origin and is destined to become immensely popular. All who have seen it pronounce it the finest of the gilt-edge type. perfect form, petals of a velvety grenade bright canary-yellow. Price 25 cts. each.

NEW PURE GOLD DWARF CANNA, SUNBEAM—(See cut, right hand corner.) This new Canna is by far the best variety producing yellow flowers, and one of the most valuable that has yet appeared. It is the largest in flower and flower heads, the finest in form and the clearest and most brilliant in color, will supercede all other yellow varieties. Owing to its immense size, splendid finish and great substance of its individual flowers, its enormous solid flower heads, the clear, bright, intense golden color of its flowers, superb habit, fine foliage and blooming as it does in such lavish profusion indoors and out, it is bound to become the most popular Canna ever introduced. NEW PURE CRIMSON CANNA, FLAMINGO—(See cut, lower left-hand corner.) The foliage is a luxuriant deep green and tropical-like; makes the most effective decorative plant imaginable, commencing to bloom when only 8 to 10 inches high and always constantly in flower; has the grace, grandeur and finish of the most exquisite orchids. 25 cts. each.

Its easy culture, growing in almost any light position, its freedom of bloom, rarely ever being out of bloom, and the grace and beauty of the flower and entire plant, will undoubtedly make this one of the most popular plants in cultivation. Price, 10 cts. each.

ASTILBE, or SPIRÆA, JAPONICA. (Ready in November) The flowers are borne in large feathery panicles of white and last a long time in bloom. Large quantities are forced by florists, though a perfectly hardy herbaceous plant. This is undoubtedly one of the most beautiful objects grown, its foliage and flowers combined making it one of the finest gems for Winter and Spring decoration in the house and conservatory, while for grace and elegance as a cut flower it has few equals. 15 cts. each.

The BEAUTIFUL WATER ORCHID OR HYACINTH—One of the most curious and beautiful plants we have ever grown. It floats in the water by means of its curiously inflated leaf stalks which resemble balloons filled with air. Double Tulips

Have massive flowers of brilliant red and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties, and in consequence, when single and double varieties are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around

the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts (those indicated by A or B) do splendidly when grown in pots for Winter blooming, but must be forced much slower than Single Early Tulips by keeping them cooler. We keep the early and late varieties separate, so you can plant the ones that bloom early together if you so desire.

Price, 3 Cents Each, or the Set of Seventeen Choice Distinct Kinds of Double Early Tulips for 40 Cents.

Early Single Flowering Tulips, Named.

TULIPS are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for Spring bedding, and for Winter flower in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest day of Spring, plant between the lines of Tulips, Scilla Siberica, Chionodoxa Lucila, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other section of Spring-flowering bulbs. Those only who have massed the different varieties, planting the bulbs four inches apart, can form an idea of their beauty and their great diversity in shade and color, and the grand effect they produce grouped in flower beds or borders. The Single Tulip is extensively grown for indoor decoration, three or five bulbs in a pot.

"Daffodils
That come before the swallows dare, and
Take the winds of March with beauty."
—SHAKESPEARE.

THE wonderful creations in the way of new varieties has awakened an interest and enthusiasm among the lovers of flowers that has placed this, "The Flower of the Poets," in the front rank of popularity and they merit all the praise that can be bestowed upon them. Appearing, as they do just after bleak Winter, they turn our gardens, lawns and woodlawn walks into gorgeous masses of gold and silver, with a fragrance that is enchanting. They are equally valuable for growing in pots for Winter flowering, and some of the varieties are forced in immense quantities by florists for cut-flowers in Winter. Narcissus are of the easiest culture, and all excepting the Polyanthus varieties, are perfectly hardy. Our collection has been much enriched, and embraces in addition to the old favorites many new varieties, including the magnificent new hybrids. We are also importing direct from China some of the genuine and wonderful "Chinese Oriental Narcissus," called by the natives "Joss Flower," or "Flower of the Gods."

THE BEST LILLIES FOR FALL PLANTING.

The True Bermuda Easter Lilly, *Lilium Harrisii*—see cut.

“The fairest of all things that blossom and grow,
Sweet as the Summer and pure as the snow,
Is the Lilly that tells
Like the glad Easter Bells.

Once more the sweet story which all hearts should know”

This peerless Lilly is the greatest acquisition to floriculture in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from Novem-

ber to May by bringing the pots [of rooted bulbs in from cold frames at intervals throughout the Winter. The quantity of bloom produced is marvelous, the average production of bulbs five to seven inches in circumference, even when forced, is from five to eight flowers, and of bulbs seven to nine inches, eight to twelve flowers; and if desired a second crop of flowers, frequently equal to the first, can be secured the same season by drying the plants off after blooming for a time and then again starting them. Blooming plants in pots form typical Easter offerings and presents, for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every winter for this purpose. As a garden lily it is of great beauty, being entirely hardy excepting in northern climates, where it requires a protection of leaves or litter to a depth of 5 or 6 inches. Price, for large bulbs, 15 cts. each, 4 for 50 cts., 10 for \$1.

With each order we send instructions how to plant, grow and care for all kinds of Bulbs, both for house and garden culture.

BERLIN MAMMOTH LILY OF THE VALLEY.

No flower is more tenderly lovely than this. Its graceful waxen bells are filled to overflowing with the most delicious perfume, and set among its own glossy green leaves it is indeed the gem of the garden. It succeeds in the open ground in almost any situation, but prefers a somewhat moist location. A top dressing of well rotted manure or rich soil in the Autumn will be found a great benefit. For house culture they are invaluable and easily managed. Place rather thickly in pots or boxes, scattering a light soil or turfy loam among the roots, but not over the tops, then cover with moss or some such substance

and place out doors until a sharp frost, when they should be brought indoors and given plenty of heat and considerable moisture. Take care to keep them shaded from the hot sun, with cloth until the stems are two or three inches high, when the shading should be removed to develop the flowers.

They make a charming sight, when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, springs, etc.

Price for the Berlin Mammoth Large Flowering Lily of the Valley, 5 cents each, 6 for 25 cents, 12 for 40 cents Ready in November for shipment.

The Chinese Sacred, or Oriental Narcissus.

A Variety of Polyanthus Narcissus.

The "Shui Sin Far," or Water Fairy Flower, Joss Flower or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery-white, with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of their new year, and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxuriant growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but are novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the Winter. See cut. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 15 cts. each; 4 for 50 cts. A dozen bulbs planted one a week will give a supply of flowers all Winter.

RANUNCULUS.

This class of bulbous plants is among the finest of all flowers. The French Ranunculus especially are distinguished by great strength, size and beauty. They attain to a height of from ten to fifteen inches, and the hues and colors of their many varieties, varying from pure white and yellow to bright vermillion and crimson, are really beautiful. The Persian Ranunculus are a little smaller than the French, and also more dwarf. However, their colors are as fine and exhibit the most beautiful shades, and are of the most graceful form. The Turban, or Turkish, Ranunculus differ very much from each other, and display lovely oriental beauty of coloring. Can be grown easily in pots or out of doors if protected. See cut.

FRENCH RANUNCULUS—Price, 4 cts. each; 40 cts. per doz.

PERSIAN RANUNCULUS—Price, 3 cts. each; 30 cts. per doz.

TRITELIA UNIFLORA.

This is one of the choicest additions to Winter-flowering bulbs that has been offered in many years. The bulbs are small, and several can be placed in a pot, each one of which will send up several flower scapes, bearing star-shaped blossoms one inch in diameter, pure white, elegantly lined with celestial blue. As the flowers follow each other successively, and last a long time before fading, a pot of these bulbs is never without flowers for several months in Mid-Winter. They are also quite hardy, and can be planted in the open ground, where they will bloom elegantly in the early Spring. We earnestly advise all lovers of flowers to plant this beautiful gem. It is sure to delight you. It is of the easiest culture and always sure to thrive. Price, fine bulbs, 4 cts. each; 3 for 10 cts.; 12 for 35 cts.

ALLIUM NEAPOLITANUM—See page 14.

Plant five or six bulbs in a five-inch pot, have the pots well drained, and plant the bulbs firmly about an inch deep. Set in a cool place and water sparingly until considerable growth is made, after which remove to where they are intended to bloom.

IRIS, SUSIANA—If every lover of flowers could see this grand plant in bloom we really believe not one in one hundred would refuse to pay one dollar each for one or more bulbs of it. Among all flowers there is hardly one of such oddity and striking beauty. The bloom is of enormous size, and in describing it we say "it is chocolate and black mottled, beautifully veined with grayish white," yet from this no one can form a correct idea of how the plant looks. It is indescribable, and the planter will be surprised when he sees it. It is perfectly hardy, and blooms in May. In July the foliage dies down, and the bulbs lie dormant until late Fall or the next Spring. Try it, and when it blooms you will undoubtedly pronounce it the most beautiful flower in your garden. Freesia Refracta Alba.

FREESIA REFRACTA ALBA.

No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room, without the overbearing perfume of Hyacinths and Tuberoses. The plant has tooth-shaped bulbs and flat-spreading leaves. Its cultivation is of the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some cool place and repot at proper season in fresh soil for another year's growth. See cut. Price, 3 cts. each; six fine bulbs for 15 cts; twelve for 25 cts.

CROCUS, MAMMOTH YELLOW.

Ornithogalum Arabicum.

The Star of
Bethlehem.—

We introduce this as a new Winter blooming bulb of great beauty and value. In magnificence there is nothing like it among Winter-blooming bulbs or plants. Even the grand Hyacinth must be preceded by the stately beauty of this flower. It is a native of Arabia. Bulb large and solid, closely resembling that of a Hyacinth, and requiring exactly the same culture. Leaves long and narrow; flower spikes 18 to 24 inches high, strong and graceful, bearing an

immense cluster of large pearly-white flowers, having a jet-black center. The individual flowers keep perfect many weeks before fading, so that for more than a month this grand spike of bloom is in full glory. Its durability is almost without an equal among flowers. Add to this its delicate aromatic fragrance, and we have a Winter-bloomer almost without a rival. Its culture is the easiest, as it will grow in any position in any window. A bulb can be planted in a four-inch pot, or several in a larger pot or box. Pot in September, October, or November. They can even be kept and planted as late as February first. For open ground culture they do well if kept from freezing severely.

TUBEROUS BEGONIAS

For Pot Plants are now classed among the handsomest Flowering Bulbs. The record of floriculture does not list a flower that has been so greatly increased in size, improved in form, and intensified in color as this. They bloom continually throughout the Spring and Summer, the flowers often exceeding six inches in diameter, and outrival in color the most brilliant and dazzling Geranium flowers; and from the time the first blossom appears until all growth is stopped by frost they are never out of bloom, and are borne in such profusion that the rich green foliage is almost hidden under the load of blossoms. For a bedding plant outdoors or for pot culture in the house, the Tuberous Rooted Begonia can not fail to give satisfaction even to the most inexperienced, as they require but little more attention than the Geranium. We have fine bulbs in the following colors: Crimson, Scarlet, Rose, Yellow, White and Pink.

Each color, 15 Cents each; or the set of six colors for only 75 Cents.

Not ready for shipment until October 1st.

Its strong, healthy habit of growth and variegated leaves make it a favorite with everyone. The illustration is a correct representation of this lovely Begonia. 20 cents each.

FISHER'S TORCH—A pure deep scarlet red, an entirely new shade; quite full and flat, all one tone of color. This is something distinctly new.

GOOD GRACIOUS—So remarkable for size as to suggest its name. The color also is unique, being a delicate shade of peach pink throughout. The form is remarkable, the petals are incurved and twisted, overlapping each other in irregular fashion, and resembling talons. It is full of petals and lasts a long time; in fact, although very early, it can yet be made late, because it remains perfect on the plant for such a length of time. We cut the first flowers on October 10th, days before any other large yellow was ready, and had perfect flowers cut a month later. See cut.

It is a remarkably vigorous grower, and has such strength of stem that it carries its great globular flowers erect, giving it a bold, majestic appearance. The form of Golden Wedding is unique; the outer petals droop downward in picturesque irregularity; the center of the flower is built high, with broad petals irregularly over-laid, so that, although the flowers are large, they are not heavy, solid-looking, like many others.

PHILADELPHIA—Immense, large round Japanese flower with grooved pointed petals of great width, reverse of petals ribbed. Color, white with faint primrose markings at the tips. Awarded silver medals in England and America. Price, 15 cts. each.

POND LILY, Pitcher and Manda—This is the most striking novelty in Chrysanthemums lately introduced from Japan. Of fine habit, with large dark-green leaves. The flowers are very large, of an entirely new type; both in form and color. The distinct and important point in this new variety—and in this it stands without a peer—is the color. The central area is of a clear canary yellow, while the outer five or six rows of petals are pure white. This strong contrast in color gives the flower the unique appearance of a Pond Lily.

WHITE CALLA, or LILY OF THE NILE—This old favorite is too well known to require any description. We offer dry roots, as they are superior for forcing and Winter-flowering purposes; they come into bloom quickly and require less room—making less foliage. Extra large dormant roots, 25 cts. each, 3 for 60 cts. First size, 10 cts. each; 3 for 25 cts.

SPOTTED LEAF CALLA—(Richardi Alba Maculata)—This plant is always ornamental, even when not in flower, the dark green leaves being beautifully spotted with white. In other respects the plant is the same as the favorite White Calla—smaller habit, 15 cts., 2 for 25

SWORD FERN.

Asparagus Tenuissimus.

We consider this extremely elegant plant to be the greatest acquisition for decorative purposes or for cutting from, that has been offered for many years. It is a climber, and is grown and can be strung like Smilax, but the extreme delicacy of the foliage cannot be described. It is as fine and graceful as Asparagus, finer than the fronds of the most delicate fern. The sprays will be in great demand for bouquet and other floral work, as, in addition to its gracefulness, it does not wilt like Smilax, but remains bright and green for weeks. Price, 15 cents each; 2 for 25 cts.

LITTLE GEM CALLA LILY—This little pigmy rarely exceeds 12 inches in height and blooms abundantly. The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. It is in every respect superior as a house plant to the larger growing variety. 20 cts. each; 3 for 50 cents. Large plants, 50 cents each.

CYCLAMEN PERSICUM

Large Flowering.

These are among the most beautiful and interesting Winter and Spring flowering bulbs for window and greenhouse culture. Not only are the flowers of striking beauty, but the foliage is also highly ornamental and decorative, even when not in bloom. TRY SOME.

CYCLAMEN EUROPEUM—Hardy in the garden if planted four inches deep. Rosy-pink flowers in autumn; beautiful foliage; Winter blooming. 15 cts. each; 2 for 25 cts.

rose with purple throat; Winter blooming. 15 cts. each; two for 25 cts.

PERSIAN CYCLAMEN—This is a variety of rare merit, producing exceedingly large, sweet scented bloom and beautifully marked leaves. 15 cts. each; two for 25c.

CYCLAMEN PERSICUM GIGANTEUM—The flowers of this variety are monstrous, colors range in crimson, rose and white, with delicately scented flowers. Mixed colors. 25 cts. each; three for 50 cts.

CYCLAMEN PERSICUM—This is a well known variety of long standing, equally as beautiful as the giant strain, flowers smaller. Fine bulbs 10 cts. each, three for 25 cts.

CYCLAMEN.

the name of Umbrella Plant. Makes a beautiful ornamental pot plant, fine for aquarium. Price, 10 cts. each; 3 for 25 cts.

STRIPED LEAVED PEPPEROMIA—Window plants will be popular. So thick and waxy like are the leaves of this parlor gem that nearly every one takes it to be an artificial plant. The leaves are distinctly variegated, white and green, and have the appearance of being powdered with frosted silver. Few plants could be more useful for table decoration, and none will stand ill-usage so readily. Its small spikes of Mignonette-like flowers are quite interesting. Price, 10 cts. each.

GLOXINIAS.

Most charming of greenhouse plants, of dwarf habit. Their flowers are produced in greatest profusion—often three or four

inches across—and are of the most exquisite and gorgeous colors, many of which are magnificent spotted, mottled and blended. Under the commonest culture they bloom continuously for months, and by starting at intervals a succession of their splendid flowers may be had nearly the whole year round. They are also exceeding useful, if planted out in a warm frame and shaded from the bright sun, for growing for cut flowers during the Summer months. Fine bulbs 15 cts. each; six colors for 75 cts. Not ready for shipment until October 1st.
